

## BEWARE PLAGUE

*Beware; the bubonic plague has hit Cardiff. Kill all rats seen as they carry the disease. These are the symptoms. You will start to feel cold and have a high temperature in a few days after a flea bite. Swellings called Buboes would appear and an ulcer that changed from orange to black would appear where you have been bitten. The victim will be confused,*

*delirious restless and slowly die after three long days. There is a 10% chance that you would get better because doctors aren't very clever.*

*A herbal remedy might help. Get some herbs Mint, Lavender, and Parsley will do. This is called a posy. Get some*

*flowers* to make your posy look pretty. Get a paper doily, baking foil, string and some ribbon. Now you can start. Arrange the

*herbs in a posy. Tie the string to the flowers and the herbs at the front. Wrap the baking foil around the stalks of the flowers, then fold the paper doily in two and wrap it around the baking foil. Then to finish tie the ribbon around it.*
